The Dougy Center Model is founded on addressing the needs of youth who are grieving, based on research, 44 years of experience, and best practices. The 90-minute, biweekly, year-round support groups are facilitated by a minimum of three adult facilitators (staff and/or volunteers) who agree to meet for a one-hour pre-meeting and one-hour post-meeting, requiring a three-and-a-half-hour commitment per group. Please note that the training is geared to program delivery specifics, and does not cover administrative, financial, fundraising, or organizational policies or procedures of running a grief support program.
